ANIMATION

experimental_media: animation

arranging sequences of time
to cover a vast array of skills, techniques, and history.

course description

EXPERIMENTAL MEDIA > ANIMATION

As an introduction to the practices of time-based media, this course explores principles and concepts of animation using traditional methods, digital imaging, and contemporary software applications.

Experimental Media:animation involves investigations of the aesthetic and conceptual transformations that happen to media as they pass into, through, and out of the digital domain.

Through individual projects and class critiques students learn about input and output devices, image manipulation, movement, sound, and the concept of time.

The objective is to learn and put into practice the basic technical skills and experimentation required in the imagemaking process to make expressive and engaging animated works.

Lectures, demonstrations, screenings and readings provide students with the opportunity to integrate concept, form and technology while exploring the possibilities of animation.

3 credits

required materials >

semester student subscription to <http://lynda.com> [program tutorial] •

process sketchbook •

external hard drive for digital storage of images, clips and files (minimum 80G)•

access to a 4 to 6 pin firewire (camera connection) • mini-DV tapes + blank CDs and DVDs •

recommended text: **Creating Motion Graphics with After Effects, Vol. 1: The Essentials**

(3rd Edition, Version 6.5) by Chris Meyer, Trish Meyer • [found at Amazon.com]

TECHNIQUES FOR CREATING 2D ANIMATIONS IN A TIMELINE-BASED DIGITAL ENVIRONMENT

EXPLORE PRINCIPLES AND CONCEPTS OF ANIMATION USING
TRADITIONAL METHODS, DIGITAL IMAGING,
AND CONTEMPORARY 2D AND 3D SOFTWARE APPLICATIONS

project:due [time+date]

Students are responsible for meeting all deadlines and/or project completion dates.

Project assignments and due date will be announced in class, posted on website and be included in handouts.

The schedule is subject to alteration, and students should make note of any changes.

This is your responsibility [a methodology of linear time].

No excuses.

project:breakdown

[value of evaluation]

60% project completion: [re:criteria per project]

10% in-class projects/presentations

10% evaluative criteria: quizzes+tutorials

20% professional attitude

(attendance, participation in class discussions, reading responses, critiques, in-class assignments, teamwork, coming to class with all materials, general preparation, meeting deadlines, and proper classroom etiquette)

grading and evaluation

The purpose of grading is to clearly and accurately pinpoint the strengths and weaknesses of your progress. You will receive a grade on each assignment and a progress report at midterm.

This report will evaluate progress, note strengths and areas for improvement. Your overall grade will be based on your understanding of the information and ideas discussed, and your formal, technical, and conceptual progress as demonstrated in projects and exercises, and professionalism during the course.

Students will be evaluated through exercises, class participation, research, presentations, and technical proficiency with various project and media applications. Aesthetic applications, and problem solving are also points of evaluation.

attendance

Maximum 3 absences--

Each additional absence lowers your grade by a full letter

Seventh absence =F

Excused absences include religious holidays, a verifiable death in the immediate family or with a doctor's note. [University policy].

If there are special/specific circumstances for your absence, contact me as soon as possible.

Late arrival/early departure=1/2 absence

Two tardies/late arrivals=1 absence

Unprepared for class [materials, project, criteria selection]= unexcused absence

Attendance factors into final grade

No makeup work for missed class session work unless prearranged with instructor.

[This means at least 24 hour notice.]

PRODUCTION TECHNIQUES

PROJECT PLANNING

LINEAR AND NON-LINEAR NARRATIVE

INTEGRATION OF VARIOUS MEDIA

EXPLORE THE POSSIBILITIES OF TIME-BASED EXPERIENCES

experimental media animation winter __ 2007

evaluation:point value

[grading]

A (100% - 90%) commendable achievement. shows understanding+thinking with originality in regard to methods for/of project application. communicates very effectively.

B+ (89% - 85%) commendable achievement. communicates effectively the concepts and content, including most of the thinking process

B (84% - 80%) adequate achievement. demonstrates an understanding of major content and concept. communicates on a limited basis

C (79% - 70%) meets criteria expectation level. Demonstrates little understanding of project application concept and content

D (69% - 60%) minimal evidence of achievement. demonstrates no real understanding of project application, is unable to communicate

F (59% - 0%) failure to meet criteria. no communication

WHAT WE DO > SCHEDULE OF EVENTS

[structure of the course]

The Art Labs are teaching spaces.

FA201 - FA223

Open lab access times are limited. When the rooms are not scheduled, students may work in these labs.

There will be specific lab hours.

Students are responsible for the school equipment and storage of their files--[either on Bengal space or on external storage devices].

Large files stored for more than a week on the desktop will be erased.

Lost or damaged equipment is the responsibility of the student.

Students using any media lab are responsible for leaving both the desktop and surrounding area clean.

This is not only good etiquette, but a course expectation.

When your work session is finished, remove your files from the desktop, collect and return materials, clean your area, and leave the room in order.

Students will work at individual stations and will be responsible for any required materials/research/images assigned or necessary for project completion.

It is expected that students will have designated time to research and work on projects during class,

A portion of the class time will include discussion and critique. Students should be prepared to participate.

Students are expected to work on each project assignment and complete assigned readings/homework.

This work reflects a portion of your grade in both the technical knowledge base [lynda.com tutorials] and through specific applications of research and media to the project.

Media lab policy:

no food. no drinks.

Bring to the space a good attitude, a willingness to work, desire to succeed..

- Turn off cell phones or keep them silenced during class.
- Arrive on time, prepared for class. With the schedule/overview available on the website, you should be aware of the requirements and expectations per class session. You will also receive a hard copy of the schedule after the first week of class.
- Class will begin on time. We will use the time during class to cover technical/essential skills and problemsolving, and understanding project expectations.
- There will be time for individual student work during most class sessions. The idea is to familiarize students with the tools, concepts and applications of an interactive studio environment while expanding competency and comfort level with the programs and peripherals in order to make the most effective work.
- There are several components to this course. We will explore them as thoroughly as the time schedule allows. Students should be prepared to work outside of the designated class time. Because there may be a variance in student background and skill/proficiency level, some exercises are specifically designed to address the functions of programs and tools. Within that framework, opportunity will be provided for students to work beyond present levels of experience and technical expertise. All project criteria will be subject to evaluation.
- The tools used within this course are the programs and peripherals. The structure of the course focuses on the use of those tools within a framework of conceptual development, visual language skills, selection and application of appropriate media in the individual development of a project. Preliminary work [sketchbook] will be included in the evaluation.
- Class attendance is required. Your level of motivation for achievement is a component of evaluation. Everyone benefits from the generation of work completed at a more advanced skill level and the collaboration of ideas.
- If you are absent, you will need to either collect class information [notes, resources] or make up any work required during class. Class notes should be acquired from another student. We meet as a class twice weekly. There will be homework [in the form of tutorials and research].
- Projects are due for critique at the beginning of class on the due date. All projects must be completed and turned in to receive a grade for the course.
- Late projects: drop one letter grade per calendar day that they are past due. [grade will be assigned, then reduced]
- If you need an extension on a project [for a legitimate reason] please make arrangements with me before the project due date.
- Back up your files and save as you go

ACADEMIC INTEGRITY AND STUDENT CONDUCT

Academic integrity is fundamental to the activities and principles of a university. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards breaches of the academic integrity rules as extremely serious matters. Sanctions for such a breach may include academic sanctions from the instructor, including failing the course for any violation, to disciplinary sanctions ranging from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting, collaboration, or any other form of cheating, consult the course instructor.

<http://academicintegrity.missouri.edu/guidelines/>

ADA > AMERICANS WITH DISABILITIES ACT

If you have special needs as addressed by the Americans with Disabilities Act (ADA) and need assistance, please notify the Office of Disability Services, A038 Brady Commons, 882-4696 or course instructor immediately. Reasonable efforts will be made to accommodate your special needs.

<http://ada.missouri.edu/>

POLICIES FOR MEDIA COURSES EXTENDED TO EXPERIMENTAL MEDIA-- > VIDEO + ANIMATION}

<http://convergence.journalism.missouri.edu/4802/policy.html>

UNIVERSITY POLICIES > RULES AND REGULATIONS

http://registrar.missouri.edu/Policies_Rules_and_Regulations/index.htm

ACCEPTABLE USE AGREEMENT > COMPUTER/FACILITIES USE POLICY

All faculty, staff, and students of the University of Missouri are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate.

it is the student's responsibility to keep apprised of any changes.]

EXPERIMENTAL MEDIA > ANIMATION
TOPICS

- History of the image
- Photography/Digital/Moving image
 - Appropriation
- Form • Aesthetics
 - Color Theory
- Image manipulation, framing, composition, compositing
- Basic staging/animation techniques
 - Image and culture
- Representation • Symbol
- Concept, conceptual storytelling
 - The website as art

COURSE OBJECTIVES

Students will demonstrate understanding of the following principles and techniques through studio assignments:

Four-dimensional imaging concepts
Motion
Duration
Pacing/Tempo
Montage
Sequence > Animated time movement
Narrative/Storyline/Concept
The Performative
Research Methods

experimental media: animation is an exploration of the image-making process using the constructed or manipulated image as a movement form. Additional equipment will include cameras, sound recording and other motion capturing devices. Both linear and non-linear formatting will be covered within a series of in-class workshops where students learn skills and techniques of time imaging specifically focused on the animated form. A comprehensive exploration and experimental practice will have students constructing a variety of exercises to make expressive and engaging work. There will be several small projects, then a final animation project will be designed by the individual student.

The objective is to understand movement and time in a digital environment and to explore the medium beyond any traditional applications.

CRITERIA > EVALUATION [reminders]

complete projects by the deadline.
work within the parameters of the project criteria
articulate the process
participate in critique
speak constructively of work by other students and/or presentations by other artists
meet expectations of group etiquette
complete work even if there is a technological issue.
[technology issues are not acceptable excuses]

PARTICIPATION > INFORMATION

Contribution to the dialogue is critical to the community of learners. Your interaction contributes to the ongoing process of learning through critique, discussion, thinking, and problem-solving. Considering alternative methods to approaching projects and solutions are an important part of the learning process for the group, complementing assignments and tutorials.

The development of critical thinking skills and a strong work ethic are integral parts in the success of both the individual and the group. The responsibility of the learner is to develop and maintain that level of performance.

A NOTE ABOUT THE COURSE SYLLABUS

As a disclaimer, these terms and schedule are subject to change at the discretion of the instructor.

PROJECT EXERCISES > PARTIAL LIST

project 1. time over time

collected image files from online resource archive.org, placed in context with collected image from media resource [web/dvd/vhs] or from realtime. The montage and the inter-mixing of forms to test camera and software for consistent narrative and imported sound.

project 2. 4x4 project

in camera project, stopmotion animation with 3D objects on a constructed set. analog/linear editing, storyboard/storytelling. a second project with 2D objects will be next, applying a software program to capture the image.

project 3. on the record >

flash animation project with stage sequences and action completed digitally, featuring the narrative of the storyteller.

project 4. imaging and interactive: AfterEffects, Dreamweaver and DVD studio pro
constructing animations for interactive forms

see course calendar for specific exercises
projects and exercises will be posted on http://randomversion.com/MU_artindex.htm

Norman McLaren

8> Tuesday, October 9

Exercise 7_website design

Completion of Dreamweaver tutorial/quiz

Reading: review selected (portfolio+architectural) design books on reserve in Ellis Library

Thursday October 11

Project 2 due. Class presentations

Tutorials on DVD Studio Pro

9> Tuesday, October 16

Exercise 8_determining order Mapping with DVD menu.

MATERIALS: blank DVD to burn project. Due at beginning of class Thursday October 25.

Reading: *The End of US Power?* in Jean Baudrillard, [America](#).

Thursday, October 18

introduce **Project 3 :image :order :animation**

Work session. [Exercise 8 due](#).

DVD reference: lynda.com tutorials.

10> Tuesday, October 23

screening: Student selected animations/short presentations

review lynda.com tutorials in Final Cut Pro + AfterEffects.

work day follows. have necessary materials for your project.

Thursday, October 25

review software Final Cut Pro+AfterEffects

[storyboard for Project 3 due](#), informal group presentations.

Screening. Archive.org/SIGGRAPH videos + other animation

and ***The Triplets of Belleville***

11> Tuesday, October 30

work day. complete presentations and overview of software/ Q&A

Thursday November 1

work session. work according to project proposal. **work due for TV>show @ Brady Gallery**

12> Tuesday, November 6

Work session—individual meetings with students

Thursday, November 8

Work session—work according to project proposal

13> Tuesday, November 13

Project 4. final project proposals due/with storyboard and process plan.

[Project 3 due](#). In-class presentations.

Thursday, November 15

Work session. install work at Brady Gallery. required project

14> *Tuesday, November 20*

Work session—check in, studio work session.

Thursday, November 22

Field trip to Ragtag (?) tentative. To screen previous animation project.

15> *Tuesday, November 27, Thursday November 29*

Thanksgiving holiday. check for lab hours if you want to work on projects ovre break

16> *Tuesday December 4, Thursday, December 6*

Final project presentations/screenings

final project presentations must be completed by end of class Thursday Dec. 6

All work not previously turned in due today in proper format.

(Turn in projects according to project plan/specifications)

All animations/sound projects on DVD and in current classes dropbox folder/your name

Storyboards/sketch books, websites, CD-ROMS, DVD or mini-DV tapes due

December 11-13 finals week

Any reworked projects or late projects (reduced point value) turned in by December 7

Pick up work in FA201.

(schedule subject to change at discretion of instructor.

it is the student's responsibility to be apprised of the changes in schedule or project)
